

## Corfe Castle Community Pre-School Curriculum

At our pre-school we offer a warm, stimulating, caring, and nurturing environment. We aim to follow our children's interests and use their lead to determine what resources we can use to extend their learning and development. We understand that every child is unique and deserves the right to safe place and education.

Our goal is to ensure that your children thrive and develop independence and confidence in all areas before they leave our setting and move onto school.

We love to inspire and challenge all the children in our care taking into careful consideration each child's individualism and levels of need. By following the child's interests and letting them question what they see, we can help make sense of the world around them leading them to flourish. We teach through encouragement and praise allowing our children to make mistakes whilst feeling safe and valued by setting boundaries and taking time to listen.

Our outside space and unique setting in our small village allows us to let the children have new experiences through exploring the outside world.

Our curriculum is designed to allow the child to lead the teachers in their learning. This allows us to follow our planning while enabling the children to be progress to their next steps and be challenged.

Our planning includes the 3 I's which are Intent, Implementation, and Impact. Using these for our small world and messy play areas we can create activities that help with extensions for language, ability and developing new skills and are set with our children's targets in mind.

We plan through a topic-based approach, but we follow the children's interests and ideas and will extend their learning to keep what they have chosen interesting.

If any new events happen in your child's life, please inform a member of staff and we can discuss this and add it into their learning to help support the child emotionally and physical.

We look forward to helping your child grow at our pre-school.
